PRODUCTS

As a proven industry leader, our commitment to product innovation and customer support is our greatest pursuit.

PERFORMANCE

Our people and products deliver quality performance for you and your operation. We believe that when you are successful, so are we.

ARCHWALL STEEL BUILDINGS

CUSTOM ENGINEERED AND BUILT FOR **YOUR NEEDS**

ArchWall Steel Buildings are your first choice for versatile, custom engineered storage. Using 100% steel construction and easy to assemble and expand, the ArchWall building can store it all: Vegetables, Hay, Grain, Fertilizer, Equipment & more.

Archwall buildings are anchored to the foundation using a die-formed footing channel, the most practical method available, making construction easier while allowing for future expansion. This unique system also supports the use of larger wall and roof panels, ensuring watertight seams and maintenance-free performance.

ARCHWALL BUILDING FEATURES

- ISO certified
- Spans: 50', 51' 62', 68'
Vegetable spans: 51', 62', 68', 90', 102' & 112'
- Heavy-duty roof & wall panels
- 4.5" Corrugation, 3.5' Panel Width
- Galvanized and pre-painted options
- Easy access doors
- Simple to follow construction & foundation details specific to each building
- Bolt-down, formed footing channel for easy connection to foundation
- Wide range of building accessories available

Footing Channel

EXPANSION VERSATILITY Your Meridian ArchWall can be easily expanded at any time simply by unbolting the existing end-wall, adding new arch sections and replacing the original end-wall.

SUPER SINGLE

**MAXIMUM SIZE & VERSATILITY:
MERIDIAN ARCHWALL SUPER SINGLE**

The patented (CDN 2990094) Meridian Super Single is our largest, most versatile building. The Super Single is a massive single span building, achieving its size by incorporating a central interior tower structure.

This single span structure allows for two large bays, and can be designed with a shared-air plenum or an independent environment for each bay. The tower also creates a safe and secure catwalk for easy access and inspection.

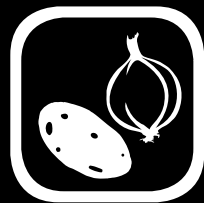

The double bay design offers an efficient, smaller energy footprint than two separate buildings, reducing initial power and water setup costs. Like our standard ArchWall buildings, each Super Single is uniquely designed for your specific needs. Meridian's engineers and drafting team will create the perfect building for your operation.

Meridian Super Single ArchWall buildings are available in 90'-120' widths, custom to your needs.

VEGETABLE STORAGE

**MERIDIAN ARCHWALL BUILDINGS ARE
THE BEST STORAGE ENVIRONMENT
FOR YOUR VEGETABLES**

Meridian's ArchWall Buildings offer vegetable producers efficient, versatile and economical storage. Meridian ArchWall buildings are available in a single building or shared double-building design. Standard ArchWall single buildings are available in sizes up to 250,000 cwt.

For producers who require flexible storage, Meridian's shared double-buildings can be designed to store a variety of vegetables in each building. The double-building design features a shared external plenum with capacities up to 500,000 cwt., suitable for large or small operations.

EQUIPMENT STORAGE

**PROTECT YOUR IRON WITH
MERIDIAN ARCHWALL**

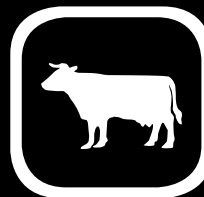

Keep your equipment maintained and out of the elements, (out of the weather) with a Meridian ArchWall Building. ArchWall buildings are designed for cold or heated equipment storage, and allow for expansion if your storage needs grow.

ArchWall steel buildings offer more durability and security than wooden pole shed buildings. With a variety of door and end-wall options, choose the best building design for your storage needs.

LIVESTOCK PRODUCTION

**MADE FOR YOUR FARM:
MERIDIAN ARCHWALL**

Meridian ArchWall Buildings offer livestock producers high quality buildings that can be used for shelter, hay storage, treatment facilities and more. The durable and sturdy designs ensure generations of use on your farm.

Whether you are looking for simple open-ended hay storage or a state of the art dairy barn, our team will work with you and your contractors to develop the right building for your operation.

GRAIN & FERTILIZER STORAGE

ARCHWALL BUILDINGS OFFER
VERSATILE GRAIN & EQUIPMENT STORAGE

When you need mega storage for your grain or fertilizer, look no further than a Meridian ArchWall Building. ArchWall grain & fertilizer buildings provide the space to store product quickly at large volumes, with the option for equipment or other storage needs, offering flexibility and a faster return on your investment.

SHOP & RECREATION

**BUILD THE SHOP OF
YOUR DREAMS** WITH A
MERIDIAN ARCHWALL

Meridian ArchWall Buildings provide great heated work areas, aircraft hangars, equestrian facilities, recreation centers and more. Our innovative Meridian engineers and design team look forward to creating the perfect ArchWall building for your business, pastime or recreational needs.
