

MERIDIAN[®]

PLASTIC STORAGE

Custom Options Available

Over 50 Years of Experience

SEAMLESS INTERIOR

All plastic materials such as resin, powder, pellets and flakes can be stored in Meridian's Smoothwall silos that feature a seamless interior. Our lined steep cone allows for a smooth and even discharge. Meridian's storage silos are cleaned, powder coated and completely sealed prior to delivery to help eliminate contaminants. Ask our team how about custom options such as fill tubes, vents, safety accessories and skid foundations.
